Student Success Starts With CCAP

AVAILABLE August 2007

2008-2009 Price: \$6/Student

Online Student Assessment Management System

Prepare your students for online testing with valid, reliable assessments provided by Region 4 and with your own district-created assessments. Then analyze student achievement data through visualization tools to plan instruction targeted to student needs.

AVAILABLE August 2008

2008-2009 Price: \$10/student

Online Curriculum/Instruction System

Help your teachers plan research-based lessons online by using the latest knowledge on content and age appropriate lesson models, instructional strategies, interventions, and questioning techniques. Then link directly to Region 4-developed curriculum materials and district-developed instructional resources.

AVAILABLE February 2009

Cost-efficient pricing is being determined

Online Professional Development System

Provide your teachers and administrators with actual in-the-classroom views of research-based instruction. Add your own links to district-developed professional development.

Prepare For Success With

CCCAP

Comprehensive • Curriculum • Assessment • Professional Development

Online Instructional System

Comprehensive Aligned Instructional System

Online Curriculum/Instruction System

- Customizable Region 4-developed scope and sequences for mathematics, reading/language arts, science, and social studies
- Templates for districts to create scope and sequences for courses
- Lesson-planning templates designed to plan for TEKS/TAKS alignment, research-based lesson models, instructional strategies, intervention plans, and questioning techniques
- Direct online connection to Region 4-developed curriculum materials
- Brief vignettes on research-based content-specific lesson models and instructional strategies, intervention plans, and questioning techniques
- Templates to add links to district-developed instructional resources

Online Student Assessment Management System

- Region 4-developed pre-made assessments that mirror the TAKS blueprint and rigor
- Region 4-developed curriculum-based assessments designed to monitor student learning following instruction of a curriculum cluster
- Database of Region 4-developed assessment items to allow the customer to build and store an assessment
- Database to enter district-created assessment items
- Assessments administered either online or printed for paper-pencil dissemination
- Data visualization of assessment results by student, teacher (class), grade level, grouping, campus, district, and/or custom fields
- Student achievement data storage for multiple years

Online Professional Development System

- Focused in-the-classroom illustrations of research-based lesson models, strategies, interventions, and questioning techniques
- Comprehensive reviews of selected TEKS to enhance the educator's understanding of the overarching concepts and processes
- Administrator overviews to support classroom implementation of research-based lesson models, instructional strategies, interventions, and questioning techniques
- Templates for districts to add links to district-developed professional development

CCAP 4 Success

CCAP Empowers Your Teachers to Provide Instruction Targeted to Student Needs

In this total system, the curriculum component is addressed by using research-based resources to design lessons that are aligned to TEKS and TAKS. The delivery of instruction is planned using research-based lesson models, strategies, interventions, and questioning techniques. Valid, reliable benchmark and curriculum-based assessments are administered online or in a paper-pencil format. Assessment results then can be easily evaluated through useful data visualization tools to begin the cycle again of planning targeted instruction for students.

CCAP Prepares Your Students for the Rigors of TAKS

CCAP provides valid, reliable pre-made assessments that mirror the TAKS blueprint and rigor for all content areas. In addition to the pre-made assessments, CCAP supplies customer districts with Region 4-developed databases containing field-tested assessment items for mathematics, science, and social studies. These databases allow districts to build and store assessments that can be administered online or printed and disseminated in a hard-copy format.

CCAP Gets Your Students Ready for the Online Testing

Within three years, certain state assessments are planned to be administered exclusively online (End-of-Course Examinations, Reading Proficiency Tests in English II, etc.). In the meantime, selected TAKS assessments will be made available by TEA in online formats. The CCAP assessment system can help prepare your students for this online format. District-created or system-provided assessments can be taken by students online (or the assessment can be printed and administered via the traditional paper-pencil format).

Why CCAP Is Right For Your District

CCAP Assists Your District with Economy and Efficiency

By legislation, education service centers are charged with assisting districts in operating more economically and efficiently. Region 4 has been very mindful of this charge in the pricing structure for CCAP. In a cost and feature comparison of the resources currently available to districts, Region 4 was not able to locate another comprehensive system that addressed the entire scope of curriculum, instruction, student assessment management, and professional development components that are available in CCAP. For some combination of these components in other online programs, estimated costs range from \$25 to \$40 per student per year.

CCAP Provides Teachers and Administrators with a User-Friendly System

CCAP functionality is designed to be efficient, quick, and responsive. The comprehensiveness of the system is intended to provide educators with a single system for student instructional needs—assessments, curriculum, lesson planning tools, instructional resources, student assessment management system, and video clips of best practice classroom instruction. This one-stop shopping approach eliminates wasted time for teachers and administrators by giving immediate access to the tools necessary to impact student achievement.

Enhances Your District Value with the Community

Community patrons typically encourage districts to pursue efficient technology solutions as a way to streamline costs while providing timely information. CCAP is a one-stop system to address the components required to impact student achievement—aligned curriculum, instruction, and assessment resources; increased educator understanding of the concepts and processes to be taught and learned; and a comprehensive management system to easily evaluate student achievement results. Your CCAP homepage will be branded with your district logo showing your educators and your community members that this is your district's comprehensive resource to impact student achievement. Even the web address for this system will be customized for your district – www.yourdistrictname.CCAP4schools.net
